Used for learning purposes only, C1 refers to the first column and R1 refers to the first row, both originating from top left.

- 1) R5 & R6 - Color the whole row of 10 squares to complete block of 10.
- 2) C5 & C6 - Again, color the whole column to form block of 10.
- 3) R1 & R8 - Block of 2 is complete, color remaining squares with 2nd color to finish row.
- 4) C1 & C10 - Block of 2 is done, color remaining squares with 2nd color.
- 5) R4 & R7 - One of the required blocks of 2 is done, color one square on each end of it with 2nd color, remaining squares must be the other two blocks of 2, so confidently color them in.
- 6) C4 & C7 - Same as last step, remaining squares are the missing blocks of 2.
- 7) All row and column number clues are met, finish any remaining squares with 2nd color.

Congratulations - you are done! These steps can be varied of course, just remember to do what you know first and the rest will follow.
